Rotovalve Light

Light Duty Rotary Valves

The **Rotovalve Light** is the solution offered by **Hanningfield** to improve product flow and build-ups in the download phase. The alternating movement of the blades allows for a constant and regular feed, thus avoiding the incorrect mixing of the product.

{xtypo_info}The **Rotovalve Light** is the ideal solution for loading powder into compression machines, fillers, mills and weighing stations.{/xtypo_info}

Thanks to its compartmented design, the **Rotovalve Light** is a volumetric dosage system of the product in the process phase.

{faq inline/tabs}

Profile

The special clamp that is supplied with the valve (quick open versions) makes it more ergonomic and sterile. The **Rotovalve Light** is also available with a **Rotovalve Light** control panel as an option.

Features & Benefits

- Easy Clean Hygienic Design
- Modular Construction
- Compact Dimensions
- 316L Stainless Steel Contact Parts
- Optional Pneumatic Actuation
- Various Gasket Material Options

Technical Specifications

- Valve body in stainless steel 1.4404 (AISI 316L) or in advanced plastic FDA approved
- Silicone coated disc, FDA approved (CFR 177.2600)
- Gasket in silicone, EPDM, FKM (Viton®) or PTFE: All elastomers are FDA approved (CFR 177.2600) F
- All Components in stainless steel EN 1.4301 (AISI 304)
- **Finish:** inside high polish [Ra < 0,1 microns], outside satin [Ra
- **Drive:** handle or rotary pneumatic actuator
