

Sterivalve

Hygienic Process Valves

The **Sterivalve** range of stainless steel modular hygienic butterfly valves offers the ideal solution for the control of powders and liquids in the pharmaceutical and associated industries.

Most valves can be manufactured to meet special applications and come with an extensive range of accessories including actuators, position sensors, mounting flanges and control systems.

Special lightweight PTFE bodied valves can also be supplied. One of the major advantages of the **Sterivalve** system is the compact design that offers a very slim profile to the main body.

Modular construction and interchangeable parts helps keep the spares requirements to a minimum.

Profile

The **Sterivalve** , offers an advanced technological answer to interception
{xtype_quote}The standard **Sterivalve** butterfly valves offers a **Sterivalve** technological answer

Features & Benefits

- Easy Clean Hygienic Design
- Modular Construction
- Compact Dimensions
- 316L Stainless Steel Contact Parts
- Optional Pneumatic Actuation
- Various Gasket Material Options

Technical Specifications Valve body in stainless steel 1.4404 (AISI 316L) or in advanced FDA approved

- Other Components in stainless steel EN 1.4301 (AISI 304)
- **Finish:** inside high polish [Ra < 0,1 µm], outside satin [Ra < 0,8 µm]
- **Drive:** handle or rotary pneumatic actuator
